### **PART III - NARRATIVE**

State below in reasonable detail why Forms 10-K, 20-F, 11-K, 10-Q, 10-D, N-SAR, N-CSR, or the transition report or portion thereof, could not be filed within the prescribed time period.

On February 14, 2005, the Audit Committee of the Board of Directors of Crown Castle International Corp. (the "Company"), with the concurrence of the Company's executive officers and independent accountants, concluded that the Company's previously issued financial statements for the fiscal years ended December 31, 2002 and 2003 and the first three fiscal quarters of 2004 should be restated as a result of certain errors contained therein.

The corrections to the Company's consolidated results of operations consist of non-cash adjustments primarily attributable to increases in site rental revenues, ground lease expense (included in site rental costs of operations) and depreciation expense. Further, the corrections will result in changes to the Company's minority interests and in the net gain on disposal of certain discontinued operations. The net impact of the accounting correction will generally be to straight-line ground lease expense over a longer period of time (as such expenses will be straight-lined over a period that is the lesser of (i) the lease term with renewal options and (ii) the greater of (a) the depreciable life of the tower and (b) the term of the tenant leases with renewal options), accelerate depreciation expense and, to a lesser extent, increase site rental revenues by considering all fixed elements in the straight-line revenue recognition (as such revenues will only be straight-lined over the current lease term, without regard to renewal options that may be exercised by a tenant, the impact will be less significant than the impact on ground lease expense).

Historically, the Company has calculated straight-line ground lease expense (for leases with fixed escalation provisions) using the current lease term (typically five to ten years) without regard to renewal options. Further, the Company depreciated all tower assets over a 20-year useful life, without regard to the term of the underlying ground lease, because of its historical experience in successfully renewing ground leases prior to expiration. As a result of this accounting adjustment, the Company will now calculate its straight-line ground lease expense using a time period that equals or exceeds the

remaining depreciable life of the tower asset. Further, when a tenant has renewal options that may compel the Company to exercise ground lease renewal options, the Company will straight-line the ground lease expense over a sufficient portion of such ground lease renewals to coincide with the final termination of the tenant's renewal options. The Company will also shorten the depreciable life of a tower asset on a ground lease (including renewal options) that expires prior to the end of its depreciable life. When calculating its straight-line site rental revenues, the Company will consider all fixed elements of a tenant lease's escalation provisions, even if such escalation provisions also include a variable element. In addition, (1) certain issuance costs from prior financing transactions will be charged to other expense or included with dividends on preferred stock, (2) certain foreign currency translation adjustments will be charged to a prior year's results of operations and (3) certain adjustments will be made to deferred income tax provisions and the estimated tax on the sale of Crown Castle UK Holdings Limited.

For further explanation of the anticipated restatement, reference is made to the Form 8-K filed by the Company on February 15, 2005, including the press release attached thereto as Exhibit 99.1.

The Company will be unable to file its Annual Report on Form 10-K for the year ended December 31, 2004, within the prescribed period because the Company has not yet completed finalizing the corrections in its accounting treatment relating to the lease accounting matters discussed above and needs additional time to complete the preparation and review of its filing following the Company's completion of a comprehensive review of its lease accounting practices. Accordingly, KPMG LLP has been unable to complete its audit. The Annual Report on Form 10-K, which was due to be filed on March 16, 2005, is expected to be filed on or before March 31, 2005. Due solely to the restatement related to its lease accounting practices, the Company expects to report in its 2004 Form 10-K a material weakness in internal controls.
